

A *Plastic Ocean*: a film review

Read a review of the film *A Plastic Ocean* to practise and improve your reading skills.

Before reading

Do the preparation task first. Then read the text and do the exercises.

Preparation task

Write the words in the correct groups.

dump	filmmaker	recycle	documentary
rubbish	shot	spoiler	waste
premiere	reuse	scene	polluted

film	pollution

Reading text: *A Plastic Ocean*: a film review

A Plastic Ocean is a film to make you think. Think, and then act. We need to take action on our dependence on plastic. We've been producing plastic in huge quantities since the 1940s. Drink bottles, shopping bags, toiletries and even clothes are made with plastic. 1) What happens to all the rest? This is the question the film *A Plastic Ocean* answers. It is a documentary that looks at the impact that plastic waste has on the environment. Spoiler alert: the impact is devastating.

The film begins as a journey to film the largest animal on the planet, the blue whale. But during the journey the filmmakers (journalist Craig Leeson and environmental activist Tanya Streeter) make the shocking discovery of a huge, thick layer of plastic floating in the middle of the Indian Ocean. 2) In total, they visited 20 locations around the world during the four

years it took them to make the film. The documentary premiered in 2016, and is now on streaming services such as Netflix.

It's very clear that a lot of research went into the film. There are beautiful shots of the seas and marine life. 3) We see how marine species are being killed by all the plastic we are dumping in the ocean. The message about our use of plastic is painfully obvious.

4) In the second half, the filmmakers look at what we can do to reverse the tide of plastic flowing around the world. They present short-term and long-term solutions. These include avoiding plastic containers and 'single-use' plastic products as much as possible. Reuse your plastic bags and recycle as much as you can. The filmmakers also stress the need for governments to work more on recycling programmes, and look at how technology is developing that can convert plastic into fuel.

We make a staggering amount of plastic. In terms of plastic bags alone, we use five hundred billion worldwide annually. Over 300 million tons of plastic are produced every year, and at least 8 million of those are dumped into the oceans. 5) Once you've seen *A Plastic Ocean*, you'll realise the time is now and we all have a role to play.

Tasks

Task 1

Match the missing sentences (a–e) with the correct place in the text (1–5).

- a. This prompts them to travel around the world to look at other areas that have been affected.
- b. These are contrasted with scenes of polluted cities and dumps full of plastic rubbish.
- c. We live in a world full of plastic, and only a small proportion is recycled.
- d. The results are disastrous, but it isn't too late to change.
- e. But the film doesn't only present the negative side.

Task 2

Complete the sentences with the words from the box.

obvious	reverse	take	term
impact	role	make	amount

1. We urgently need to action about the plastic waste problem.
2. The hurricane had a devastating on the island.
